-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1746

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jordan (U. S. Pat. No. 2,565,855).

Re claim 1, Jordan is cited disclosing a cleaning apparatus (see col. 3, line 20) for a pillared device (t), comprising: an outer tank (8), further including thereof opposing sidewalls respective upper edges, said upper edges further having respective openings to allow a shaft extending out from two ends of said pillared device to pass through; an inner tank (11) within said outer tank for containing said pillared device, supported upon a floor of said outer tank, at least enabling a portion of said pillared device to be immersed into a first cleaning solution contained in said inner tank; a lid (19); and a plurality of nozzles constructed in an interior of said lid to spray a second cleaning solution onto said pillared device that differs from the claims only in the recitation of the lid covering the out tank. Nonetheless, to have the lid covering the outer tank as well in Jordan, is deemed to be an obvious extension of the teachings of Jordan. Re claims 2 and 7, while not disclosed by Jordan, it is obvious that the structure as disclosed would be capable of treating any type of cylindrical/pillared object. Re claims 3 and 4, no patentable distinction is deemed to exist between the shape as claimed and the shape

as taught by Jordan. This is also applicable to the type of cleaning fluid used, since the same is dependent upon the application of the device.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Japan'286, Tani, Ziska, Postlewaite, Christian, Swift, Shaw et al., McBeth, Dauphinee et al., Link, Budinsky et al., Clement, Bathke, Hasse, Arnold< Day et al., and Peik, note the cleaning means .
